Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-18, drawn to a packaged product, classified in class 206, subclass 581.

Group II. Claims 19-24, drawn to a method of packaging a product, classified in class 53, subclass 467.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group II and Group I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product disclosed in Group I does not include the limitation of the groove disclosed in the process of Group II, thereby indicating that the package of Group I is not limited to the method of Group II. Additionally, the process of Group II calls for a first and second opening, whereas the package of Group I is operable with only one opening. It should also be noted that the process of Group II omits the limitation of an adhesive applied mirror and the specified product material disclosed in the product of Group I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. A telephone call was made to Thomas Cunningham (Reg. No. 45,394) on August 26, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).
